## ABOUT

- During my computer sciences degree, I have acquired key skills including front end development, UI/UX design and also acquired some Python Rest api with flask and Data Science related skills
- worked individually and as part of a team working in various projects
- doing freelancing for 2+ years in UI/UX design (Fiverr)
- acquired leadership skills during my time as ambassador of JADU Fellowship and mentorship program

## SELECTED PROJECTS

### SEEK SEO (FYP)

- Built with React and SCSS on front end and on back end Python is being used to scrape the website and utilized via Rest api
- The website is built as a single page application (SPA) with sections for displaying SEO information warnings suggestion

### CHAT APP

- Built with react on front end and firebase is used for back end.
- User login using google account and can chat in a group.

### MOVIES DATABASE

- Built using react as front end and TMDB (the movies database) api
- Homepage shows popular movies, their ratings and description
- User can also search any movie through the search bar
